

## ActiveGuard™ Mattress Liners helps protect hotels from bed bugs

**A**ctiveGuard™ Mattress Liners are a revolutionary mattress and box spring product (EPA registered) that kill bed bugs and dust mites! Fashioned and installed simply and as quickly as a fitted sheet, ActiveGuard provides long-lasting protection against bed bugs for up to two years.

ActiveGuard is the only pro-active tool for preventing a potential bed bug infestation before it establishes. The liners typically kill bed bugs within 72 hours; even those resistant strains studied! Thin and breathable, ActiveGuard are superior to any other bedding cover and will continue to work 24/7 even if ripped or torn; a decided advantage especially when installed on a box spring!

Extensively lab and field tested, ActiveGuard's ability to keep on killing bed bugs provides continual protection against any adult bed bugs, nymphs or eggs that may be introduced into a room.

Here are a few more important aspects on how ActiveGuard Mattress Liners can help you:

**Performance:** ActiveGuard actually kills bed bugs dead generally within 72 hours. You can view the video of how the product works through time lapse videography on the Allergy Technologies' YouTube Channel.

**University Lab Tested:** Dr. Susan Jones of The Ohio State University published a peer-reviewed industry article on June 7, 2013 that supports the performance and use of ActiveGuard Mattress Liners in killing bed bugs.

**The Statler Hotel:** Rick Adie, General Manager of the showcase hotel for Cornell's world-renowned School of Hotel Administration was recently quoted when asked whether ActiveGuard was effective and would he recommend them: "We have had them on our mattresses for three years and have had no confirmed bed bugs. I sleep better at night knowing that they are on the mattresses. I spent quite a bit of time researching this prior to purchasing and became a believer. Frankly I am not sure why ActiveGuard has not been recognized as the only solution for the problem."

Allergy Technologies, manufacturer of ActiveGuard, is a subsidiary of A. Carey Co. LLC, which focuses on using philanthropy as a core business strategy for its businesses. Through its Philanprofit strategy, a portion of all ActiveGuard proceeds go to help fund inner-city homeless and women's shelters and asthma clinics.
