Dear Ms. Pappas,

Thank you for introducing *ActiveGuard*® Mattress Liners to our treatment regimen here at M&M Environmental Pest Control. It has been a pleasure working with you and your company. I know without a doubt that utilizing your product and building a relationship with Allergy Technologies will prove to be extremely fruitful.

After an extensive six (6) month study in over 250 rooms, *ActiveGuard*® Mattress Liners have proven to us to be a major tool in solving the issue of long term control of bed bugs in an assisted living environment. These liners have consistently killed residual bed bugs where they often seek harborage (bedding) and provide a persistent barrier to effectively control and eradicate newly introduced bed bugs safely and effectively, thus greatly reducing call backs. This additional control and preventative tool will prove to be a pivotal factor for us in achieving success in our bed bug treatment programs going forward.

I am confident *ActiveGuard*® is the future of bed bug treatment, and we are proud to work with the Allergy Technologies team.

Regards,

Anthony John
