

"When used in conjunction with a conventional bed bug treatment, *ActiveGuard*® Mattress Liners are an effective tool in the battle against bed bugs. They have meant the difference between success and failure in a particular multi-family housing unit that we service. Without them we would have had to perform several costly heat treatments for free in an attempt to rid this 100+ unit apartment complex of bed bugs. With the introduction of *ActiveGuard* we were able to completely free the building of bed bugs for the first time in eight years.

"*ActiveGuard* has now become a standard protocol product for Griffin. We use it extensively in both curative and preventive treatment strategies."
