For over two years now, *ActiveGuard* Mattress Liners have been an important tool in Rottler's bed bug toolbox. It is now part of our Signature Bed Bug heat treatment to cover the box spring with an *ActiveGuard* Mattress Liner. This final step in our service helps to ensure that bed bugs that may have survived the heat treatment in the box spring will be taken care of.

We feel strongly that incorporating the liners as a final step in our treatment protocols has reduced callbacks for us. They are an effective tool in our fight against bed bugs. They continue to work even after we leave the job site.

Thank you,

Tom Fitzgerald
Bed Bug Service Supervisor
